CO-HOSTED BY GNOME™ KDE

JOIN US ONLINE FOR LINUX APP SUMMIT

Welcome to the 3rd edition of the Linux App Summit for growing and promoting the Linux app ecosystem across the globe! LAS brings together people all across the Linux application development process, working on everything from packaging and technical development through to supporting communities and building businesses.

We've decided to hold the conference online again this year. We will combine both the exciting and informative contents of previous years with the opportunities afforded by remote attendance. With LAS 2021, we aim to have our largest and most diverse crowd yet, reaching new technical and geographic communities.

AREAS OF FOCUS

EXPAND PARTNERSHIPS

The growth of Linux-based hardware in consumer-grade laptops, corporate computing, data centers, and mobile devices proves the importance of investing in the Linux app space. App stores are offering thousands of applications and games. This ecosystem provides a wide offering that boosts productivity, meets needs, and provides entertainment while empowering users by protecting privacy and offering choice. LAS is the best opportunity to meet others working within the app ecosystem and forging the connections you need to move your projects forward.

PLATFORM DIVERSITY

There are options for however you like to work. Whether you prefer GTK, Electron, or Qt, whatever your favorite programming language is, and however you like to package and distribute your apps, you have a place at LAS. Conversations are inclusive of all technical topics.

TECHNOLOGICAL EXCELLENCE

The Linux app ecosystem is the birthplace of foundational platform innovations that are present in the contemporary Linux operating system. Software like WebKit, D-Bus, and Wayland were incubated in the apps ecosystem and are an indelible part of how we use technology today. We continue this exploration of technical excellence though new developments, including advancements in containerized applications.

COMMUNITY

The Linux app community started in 1996 with the goal to revolutionize how we use computers. Today KDE, GNOME, and numerous other organizations and individuals still dream of building the best interface for modern computing. Turning this dream into reality requires a strong engineering vision and grounded goals, which must be powered by an open and diverse community. LAS and the Linux app ecosystem value all contributions and contributors, regardless of their skills, level of experience, or background. Sharing community challenges and collaboratively building best practices is necessary for building strong communities.

LEGAL AND LICENSING

Everyone developing software needs to be aware of basic licensing concerns. We all benefit from learning about the latest legal issues and discussions around licensing in Linux and open source. Whether you are a die-hard free software advocate or looking to write a commercial application or game, these conversations are necessary for your work.
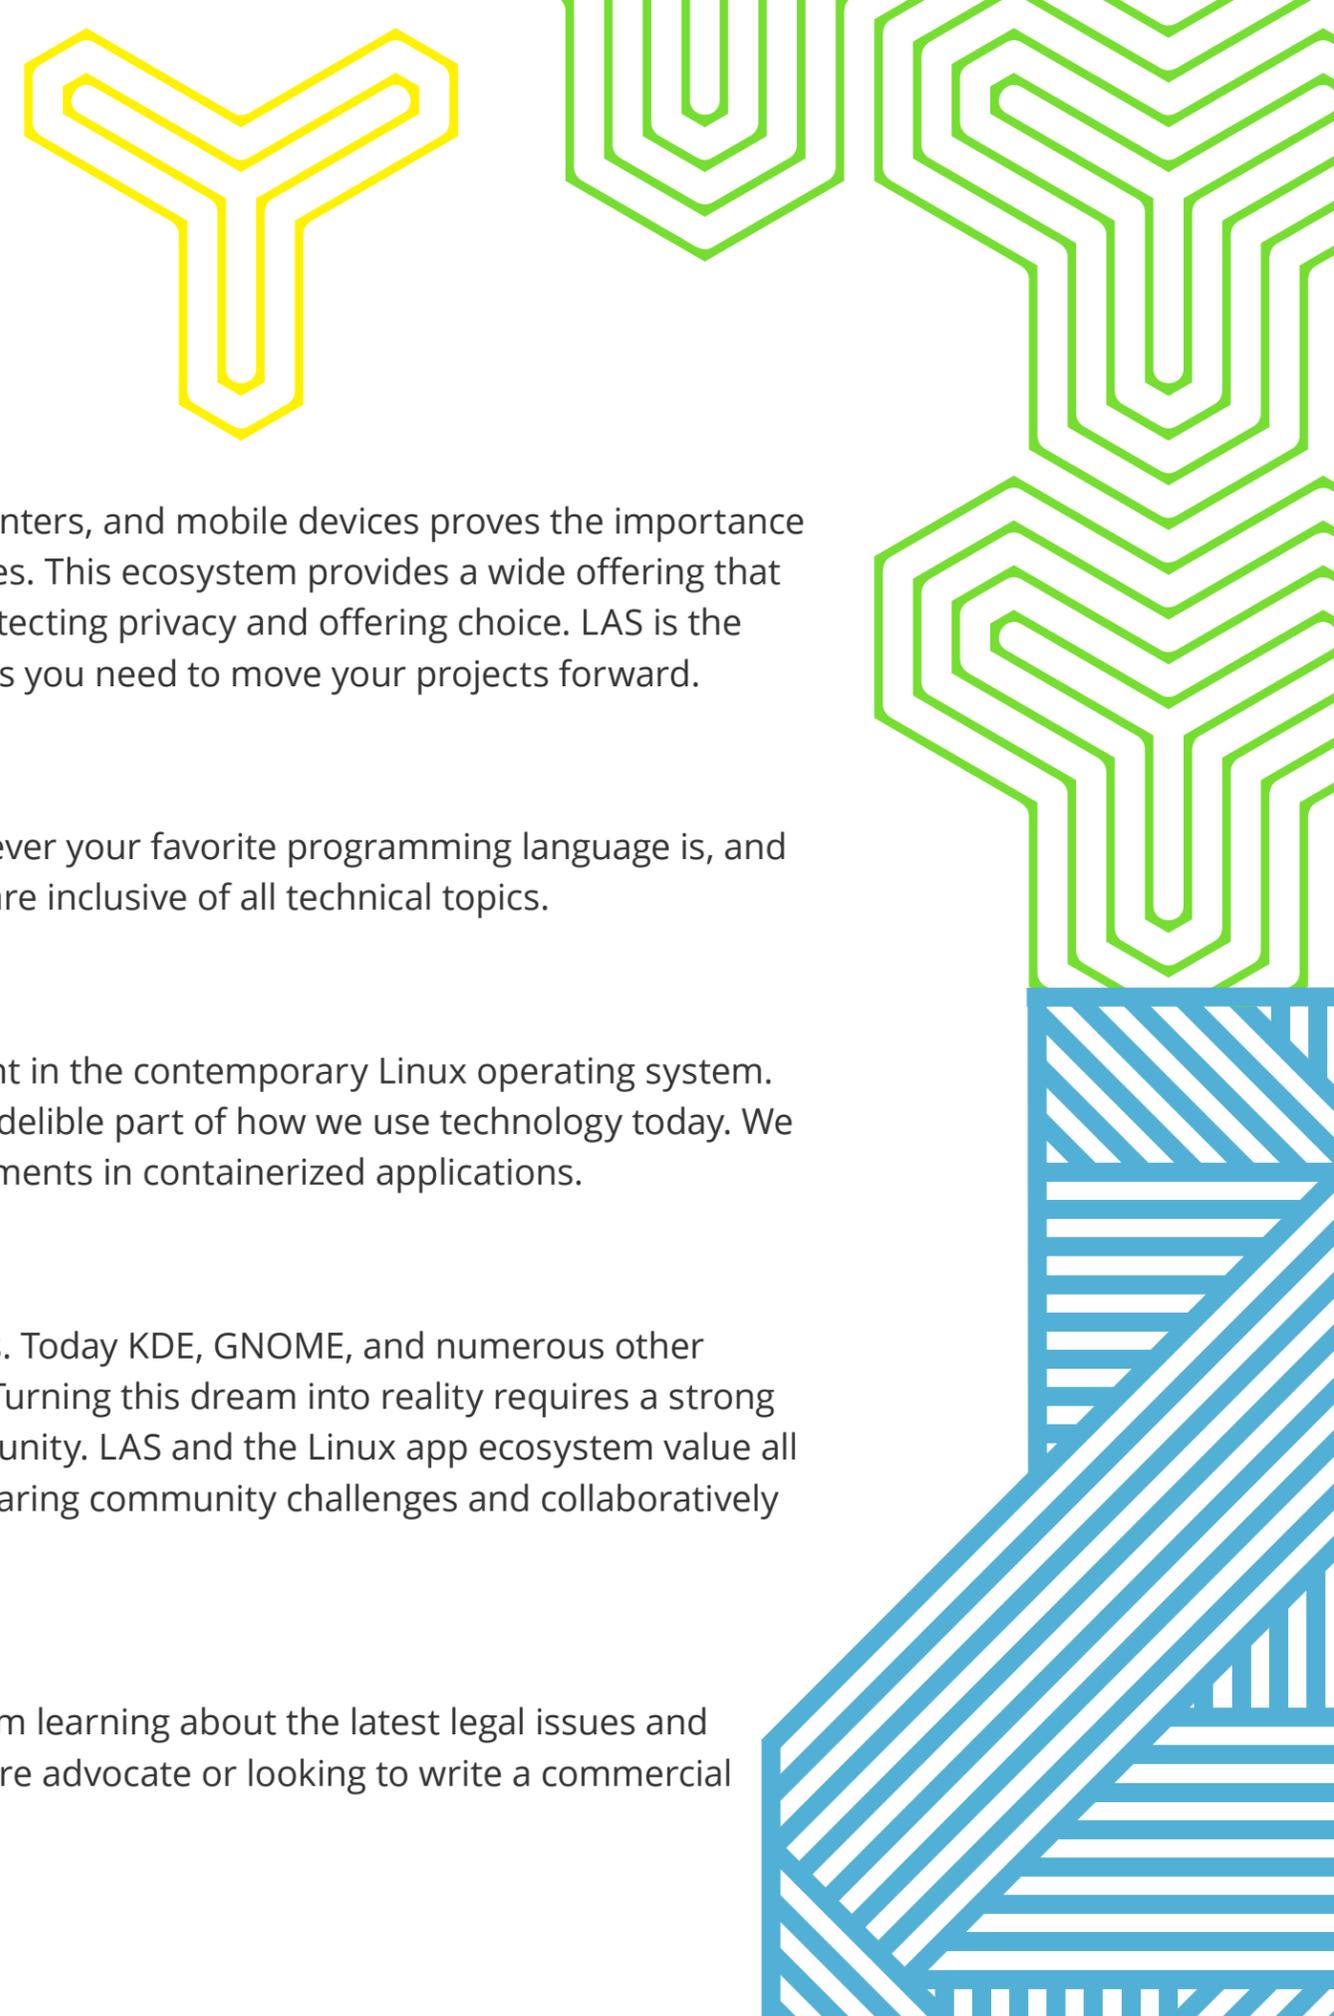

SPONSOR LAS

Sponsor the Linux App Summit 2021! In addition to Linux workstations, we are seeing Linux based applications appearing on all types of devices, including mobile devices and kiosks. Supporting LAS is a way for you to support the Linux app ecosystem and get your organization and branding in front of hundreds of app builders, growing companies, and people passionate about technical, organizational, and community excellence.

Your sponsorship helps fund a conference that is at the intersection of user-experience, software development, and hardware distribution. The Linux App Summit is a unique conference focused on an emerging market. It enriches the Linux app community, a necessary step for the future of technology and wider adoption of Linux and open source.

There are several ways you can support the conference and gain maximum exposure for your organization. We have a range of sponsorship levels to meet any budget starting at 500 euros. If you're interested in a custom sponsorship package, contact us at **sponsors@linuxappsummit.org**.

TRENDSETTER
3,000 €

- Thank you between virtual sessions
- Logo, link, and prerecorded message on our website
- 45 minute "office hours" included in the event schedule
- Prerecorded interview posted to LAS website
- Thank you during closing session

BACKER
1,500 €

- Logo on the website
- 45 minute "office hours" included in the event schedule
- Thank you during opening session

CHAMPION
2,000 €

- Thank you between virtual sessions
- 45 minute "office hours" included in the event schedule
- Thank you during closing session

SUPPORTER
500 €

- Logo on website

Invoices can also be provided in USD.
